## Education

|                                                                                                         |                        |             |
|---------------------------------------------------------------------------------------------------------|------------------------|-------------|
| <b>B.E. Computer Science &amp; Engineering</b> – <i>Sri Shanmugha College of Eng. &amp; Tech, Salem</i> | <b>CGPA: 7.82</b>      | <b>2025</b> |
| <b>HSC</b> – <i>Modal School, Salem</i>                                                                 | <b>Percentage: 87%</b> | <b>2021</b> |
| <b>SSLC</b> – <i>Sri Vidhyaa Mandhir Matric Hr. Sec. School, Namakkal</i>                               | <b>Percentage: 88%</b> | <b>2019</b> |

## Technical Skills

**Languages:** PYTHON, SQL, JavaScript (ES6+), Dart, HTML5/CSS3

**Frameworks & Libraries:** React Native (Expo), Flutter, React.js, Node.js, Express.js, Pandas, NumPy

**Databases & Backend:** MySQL, MSSQL, MongoDB, Supabase, REST APIs, Sequelize ORM

**Developer Tools:** VS Code, PyCharm, Android Studio, Git, GitHub, Postman, SSMS

## Freelance Projects and Experience

**Kleidsys Technologies – Software Developer (On-site)** (Aug, 2025 – Present)

- Actively developing, scaling, and optimizing production-grade cross-platform mobile apps using **React Native**, **Flutter**.
- Architecting backend service workflows in **Node.js** and managing complex database models using **MSSQL** and **Sequelize ORM**.
- Writing optimized SQL queries, indexes, and stored procedures to facilitate smooth real-time data fetching for enterprise service tracking and inventory systems.

**DaddyBaddy – Social Photo Face-Off App**

- Designed end-to-end UI/UX flows for Gen-Z focused photo battles and real-time voting face-offs.
- Implemented battle creation logic, challenge setup workflows, active battle states, and automated leaderboards.
- Structured backend REST API endpoints and SQL relational schemas for managing user accounts, battle states, vote tallies, and global rankings.
- Defined data verification and moderation guidelines to prevent unauthorized user submissions and misuse.

**Farmer-to-Consumer Platform**

- Designed and engineered a direct marketplace application bridging local farmers and buyers.
- Developed role-based workflows for farmers, buyers, logistics partners, and administrators.
- Structured SQL database schemas for product cataloging, order tracking, and delivery status updates.
- Formulated financial settlement workflows and transaction handling logic between end buyers and suppliers.

## Technical Projects

- Sentinel-LLM Security Gateway (Python, FastAPI, Gemini API):** Designed and engineered an asynchronous privacy proxy to sanitize sensitive enterprise data before routing prompts to LLMs, featuring automated PII redaction, dynamic regex pattern matching, context-aware masking, and reverse metadata mapping.
- Biometric Attendance System (React, Node, MySQL):** Developed a role-based employee attendance app featuring automated leave calculations, relational database triggers, and stored procedures.
- GST Bill Web App (MERN Stack):** Built a automated invoice generation platform utilizing Python and JavaScript to process HSN tax mapping, calculate breakdowns, and output PDF invoices.

## Certifications & Internships

**NPTEL Online Certification Course**

- Cloud Computing (Elite - 2024) • Programming in Java (2023) • Programming in Python (Elite - 2022)

**Internships & Training**

- Data Science Internship • Wings Technocrat

MERN Stack Internship • Iview Sense
